Professional Summary

Frontend Developer with 5+ years of experience building responsive, scalable, and user-friendly web applications using modern frontend technologies. Experienced in developing production applications with Vue.js, customizing Shopify themes using Liquid, and building reusable UI components tailored to business requirements.

Strong background in frontend architecture, REST API integration, responsive design, component-based development, and delivering high-quality user experiences across web and mobile platforms. Previously worked as a UI/Web Designer, providing a strong foundation in user interface and user experience principles.

Experienced with React.js and modern React development, including Hooks, React Router, Context API, API integration, and component-based architecture through hands-on real-world projects. Passionate about writing clean, maintainable code and continuously improving frontend skills.
